**To Purchasers/Users:** This MSDS contains important safety, health and environmental information. Federal regulations require that employers make this information available to their employees. If you are a reseller of this product, you should supply a copy of this MSDS to purchasers.

**SECTION II : HAZARD(S) IDENTIFICATION****EMERGENCY OVERVIEW:****POTENTIAL HEALTH EFFECTS**

**EYES:** Dust can irritate the eyes and upper respiratory system. May cause inflammation of the tissue linings of the eyes and cornea.

**SKIN:** Slurry can dry the skin and cause alkali burns.

**CARCINOGENICITY:** Not Determined

**MEDICAL CONDITION  
AGGRAVATED BY  
EXPOSURE:** Contact dermatitis. Respiratory disorders may be aggravated by exposure.

| The components of this product are in compliance with the chemical notification requirements of TSCA.<br>This product contains the following toxic chemical or chemicals subject to the reporting requirements of Section 313 of Title III of the<br>Emergency Planning and Community Right-To-Know Act of 1986 and 40 CFR Part 372: |            |            |

## SECTION IV : FIRST AID MEASURES

|             |                                                                  |
|-------------|------------------------------------------------------------------|
| EYES:       | Irrigate eyes with gentle flowing water. Seek medical attention. |
| SKIN:       | Wash skin with soap and water.                                   |
| INHALATION: | Remove from exposure.                                            |
| INGESTION:  | Contact physician                                                |

## SECTION V : FIRE FIGHTING MEASURES

|                                          |                             |
|------------------------------------------|-----------------------------|
| FLAMMABLE PROPERTIES:                    |                             |
| Flash Point: non-explosive-non-flammable |                             |
| Flammable Limits: NA                     |                             |
| SUITABLE EXTINGUISHING MEDIA             | NA                          |
| UNUSUAL FIRE & EXPLOSION HAZARDS:        | NA                          |
| SPECIAL FIRE FIGHTING INSTRUCTIONS:      | This product will not burn. |

## SECTION VI : ACCIDENTAL RELEASE MEASURES

**SPILL/LEAK PROCEDURES:** Sweep up material; follow good housekeeping procedures. Wear personal protective equipment. Emergency procedures are not required.

**CONTAINMENT:** Do not release into sewers or waterways.

## SECTION VII : HANDLING AND STORAGE

|                     |                                  |
|---------------------|----------------------------------|
| Handling & Storage: | No special precautions required. |
|---------------------|----------------------------------|

## SECTION VIII : EXPOSURE CONTROL/PERSONEL PROTECTION

|                       |                               |
|-----------------------|-------------------------------|
| THRESHOLD LIMIT VALUE |                               |
| RESPIRABLE DUST:      | 5 Milligrams per cubic meter  |
| TOTAL DUST:           | 10 Milligrams per cubic meter |
| ENGINEERING CONTROLS  |                               |

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| VENTILATION:                   | Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs (Sec. 2). Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>ADMINISTRATIVE CONTROLS</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| RESPIRATORY PROTECTION:        | Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH - approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or non-routine operations (cleaning spills, reactor vessels, or storage tanks), wear an SCBA. <i>Warning! air-purifying respirators do not protect workers in oxygen-deficient atmospheres</i> . If respirators are used, OSHA requires a written respiratory protection program that includes at least: medical certification, training, fit-testing, periodic environmental monitoring, maintenance, inspection, cleaning, and sanitary storage areas. |
| PROTECTIVE CLOTHING/EQUIPMENT: | Wear chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact. Wear protective eyeglasses or chemical safety goggles, per OSHA eye-and-face protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. appropriate eye protection must be worn instead of, or in conjunction with contact lenses.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| SAFETY STATIONS:               | Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| CONTAMINATED EQUIPMENT:        | Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| COMMENTS:                      | Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the toilet, or applying cosmetics.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## SECTION IX : PHYSICAL AND CHEMICAL PROPERTIES

|                      |                       |
|----------------------|-----------------------|
| APPEARANCE:          | powder                |
| COLOR:               | grey white or colored |
| VAPOR PRESSURE:      | not applicable        |
| VAPOR DENSITY:       | not applicable        |
| SOLUBILITY IN WATER: | slight                |
| SPECIFIC GRAVITY:    | not applicable        |
| EVAPORATION RATE:    | not applicable        |
| BOILING POINT:       | not applicable        |
| ODOR:                | odorless              |

## SECTION X : STABILITY AND REACTIVITY

|                           |                                                                                                  |
|---------------------------|--------------------------------------------------------------------------------------------------|
| CHEMICAL STABILITY:       | Is stable at room temperature in closed containers under normal storage and handling conditions. |
| INCOMPATIBILITY:          | None                                                                                             |
| HAZARDOUS DECOMPOSITION:  | None                                                                                             |
| HAZARDOUS POLYMERIZATION: | Will not occur.                                                                                  |

## SECTION XI : TOXICOLOGICAL INFORMATION

Not Available

## SECTION XII : ECOLOGICAL INFORMATION

Not Available

## SECTION XIII : DISPOSAL CONSIDERATIONS

**Regulatory Requirements:** Follow applicable OSHA regulations (29 CFR 1910.120)

**Waste Disposal:** Dispose of as common waste in compliance with federal, state and local regulations.

## SECTION XIV : TRANSPORTATION INFORMATION

U.S.A. DOT: Not restricted

IATA: Not restricted

## SECTION XV : REGULATORY INFORMATION

### EPA REGULATIONS

RCRA Hazardous Waste Number: Not Listed (40 CFR 261.33)

RCRA Hazardous Waste Classification (40 CFR 261.??): Not classified

CERCLA Hazardous Substance (40 CFR 302.4) listed/unlisted specific per RCRA, Sec. 3001; CWA, Sec.311 (b)(4); CWA Sec. 307(a), CAA, Sec. 112.

CERCLA Reportable Quantity (RQ), ?? Lb.

SARA 311/312 Codes:

SARA Toxic Chemical (40 CFR 372.65): Not Listed

SARA EHS (Extremely Hazardous Substance) (40 CFR 355): Not listed, Threshold Planning Quantity (TPQ)

### OSHA REGULATIONS

Air Containment (29 CFR 1910.1000, Table Z-1, Z-1-A): Not Listed

OSHA Specifically Regulated Substance (29 CFR 1910.????)

## SECTION XVI : OTHER INFORMATION

None
