Moov Mini LED Lights

Moov mini LED light is designed to be durable due to its heat dissipation technology. In addition, the light is completely waterproof and requires less space for installation.

Moov Transformer (MT100S)

Certified VAC transformer with wall outlet and switch. Connect up to 6 lights on it. 12VAC and 14VAC compatibility.

Availability

Moov mini LED light is available in two models, either white or color, with a wire length of 25 or 100 feet.

The color LED light (RGB) has 16 sequences!

- Fits into a 1.5" water return
- Connects into a transformer

Instructions

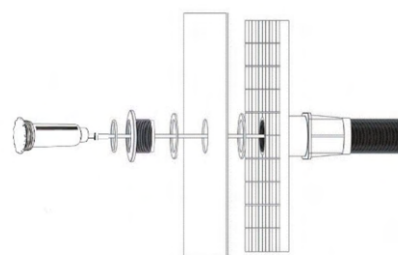

This LED pool light is designed to be installed in most 1 ½ inch pool nozzles.

The light should be positioned on the side of the pool approximately 30 cm below the pool level in an easily accessible area.

CUL certified for safe use on the wall or bottom of the pool.

SJOW wire can be buried underground for multiple years.

*You may use the MTFGA as an adapter for certain specific lights.

Technology	LED	LED	LED
Part Warranty	1 year	1 year	1 year

Note : Frequent voltage fluctuations can irreparably damage the lamp. If the installation must take place in areas where these changes may be frequent, a system to protect the lamps must be installed on the electric system of the pool. A certified pool light low voltage transformer is required to operate the light.
