

Complete Commercial Pool Treatment Solutions

At CCH®, we make excellence in commercial spa and pool treatment easy to achieve. We specialize in providing all-in-one commercial pool care solutions that feature our powerful automated feed systems, unrivaled disinfection solutions, and intuitive Cloud-based technology to help you achieve the results your clients require more efficiently and cost-effectively.

Our focus and commitment is to your success, with solutions that help you achieve the highest quality pool care and the greatest return on your investment. CCH® chemistry, equipment and technology solutions will set you apart from the competition.

Driving Satisfaction & Success

From multi-unit housing to HOA's, medical facilities to healthclubs, hospitality to other pool and spa facilities, CCH provides the automated feed systems, chemicals, remote monitoring technology and exceptional support you need to succeed. Our all-in-one pool treatment solutions lead the market and empower you to provide exceptional pool experiences, more cost-effective operations and enhanced customer service - **discover the CCH difference.**

High-capacity Calcium Hypochlorite Erosion Feeder Systems

Our full lineup of high-capacity erosion feeder systems are versatile, lightweight, highly efficient and feature modular space-saving designs. They're innovative, easy to maintain and service, and offer flexible designs to enable easy integration for small to large commercial pools. Our solutions make your work easier, safer, and more cost-effective – so you can deliver crystal-clear water in the pool and spa environments you manage.

Chlorinate Consistently, Increase Calcium & Balance Alkalinity

CCH® offers a full lineup of pool treatment chemicals and maintenance products with a wide range of benefits:

- » Longer shelf life than liquid bleach
- » Easy to transport and use
- » Dry chemical that does not leak
- » Effective alternative to chlorine gas and liquid bleach
- » Contains a scale inhibitor for improving feeder maintenance
- » Reduces chloramine odors dramatically when compared to bleach
- » Calcium hypochlorite (Cal Hypo) is less damaging on plaster and equipment

Cal Hypo Delivers 3-in-1 Power, Value & Results

As one of the most widely used chemicals for sanitizing commercial pool water, Calcium Hypochloride (Cal Hypo) is the only commercial pool treatment sanitization method that chlorinates, removes organics and metals, boosts hardness and shock treats in one process – while also increasing calcium levels to protect plaster and balancing alkalinity to stabilize pH.

CCH® Cal Hypo tablets provide exceptional water clarity, contain no CYA (Cyanuric Acid) and require a fraction of the storage space liquid bleach requires – while driving savings against bleach and trichlor by eliminating the need to purchase calcium chloride and sodium bicarbonate as well as bleach degradation. In fact, studies have shown that Cal Hypo can lower water treatment costs by as much as 54%* when compared to Trichlor.

	 Kills Bacteria	 Minimal Degredation after 1 year	 Plaster Protection	 CYA-free	 Works with ORP	 High Output Cal Hypo
CALHYPO						
TRICHLOR						
BLEACH						
SALT						

GuardTec®

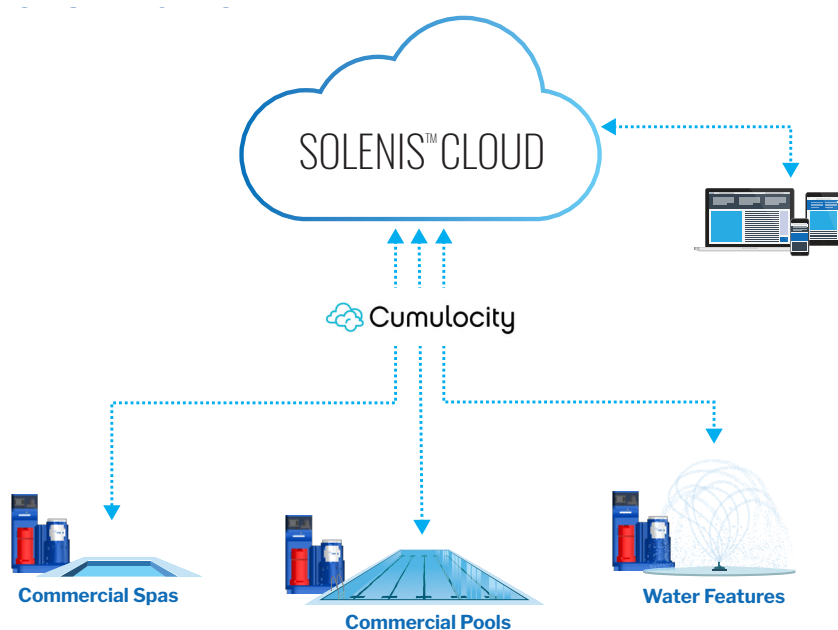

One Platform For All Your Pool Management

The CCH® GuardTec IoT System brings clarity to pool water and to every decision in the operation and management of commercial pools, spas and water features. Easily and instantly monitor, diagnose and manage water quality in multiple pools from your online device in real-time.

CCH® GuardTec enables easy online management for pool operators and facility managers of all your aquatic facilities, individual pools, spas and parks – so you can instantly view, analyze and take action.

Powered by cloud-connected software that analyzes and reports your pool data, a modular and intuitive system that supports any commercial pool or spa design, and industry-leading chemistry that creates safer and more sustainable pools, CCH® GuardTec is an all-in-one pool management solution that begins controlling, reporting and troubleshooting the feed system immediately in real-time to the facility manager and service team. It's that easy.

CCH® GuardTec Features & Benefits:

Real-time monitoring of chemical consumption

- » pH, ORP, FAC (coming soon) displayed in real-time along with temperature, probe life and controller set points. Chemical usage and trends with historical analysis options.

Notifications & Alarms:

- » Customizable notifications via email to designated recipients and Alarm Categories

Water Link® Spin Touch® Connected Water Testing:

- » Auto-calibrate GuardTec probes to match wet test and upload manual wet test results for viewing and reporting.
