JACK'S MAGIC® METAL SOLUTION TOO THE BLUE STUFF®

Metal Solution Too, **The Blue Stuff**® is highly effective in all pool systems. **The Blue Stuff** has been specifically developed for pools with heaters and pools located in areas where copper or high sanitizer levels are a common water condition. **The Blue Stuff** was developed to be far superior at removing copper from water than any other product on the market today. **The Blue Stuff** is the most recommended product for quartz and aggregate finishes nationwide.

DIRECTIONS FOR STAIN PREVENTION

Initial Dose:

Add one quart (32oz.) per 10,000 gallons of pool water. In problem water areas, two quarts are recommended.

Maintenance:

Maintenance levels for **The Blue Stuff** are 10 - 12 ppm. To determine the amount of **The Blue Stuff** to add to achieve this level, have pool water tested weekly with a **Jack's Magic Sequest Test™ Kit**. If a **Sequest Test** is not available, an estimated dosage of 6 - 8 oz. of **The Blue Stuff** per 10,000 gallons of pool water may be added on a weekly basis. Please keep in mind that this is strictly an estimate and the only way to accurately determine the appropriate dosage is to have it tested.

DIRECTIONS FOR STAIN REMOVAL

Metal Solution Too, **The Blue Stuff** is not recommended as a stain removal product by itself. In order to determine the appropriate method of removing existing stains, use a **Jack's Magic Stain ID™ Kit**.

CAUTION: KEEP OUT OF REACH OF CHILDREN

Contains: Phosphonic Acid

If swallowed, rinse oral cavity, drink large amount of water and seek medical attention. For skin and eyes, flush with water for 15 minutes. For eyes, seek medical attention.
