POWERFUL SUCTION. FAST CLEANING. INTELLIGENT.

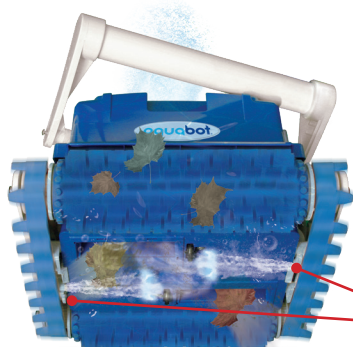

The Aquabot Turbo T Plus is designed to clean residential In-Ground Pools of all sizes and surfaces. The Aquabot Turbo T Plus provides intelligent cleaning for your in-ground pool by spending most of its time on the bottom where the majority of the dirt can be found. It also cleans pool walls and waterlines (every fourth pass).

This cleaner is equipped with NeverStuck™ Rollers to help overcome main drains and other obstacles, as well as G-Tooth™ tracks to protect your cleaner from excessive rubbing against your pool sides. This cleaner uses Float-to-Turn technology to maneuver around the pool.

Additionally, it is equipped with patented Power Washing Jets to flush out silt and pollen from corners, pool pores and seams.

KEY FEATURES

- Extra Long 60' Cable with Swivel
- Patented Power Washing Jets
- Cleans Pool Floor, Wall and Waterline
- Programmable for External Timer*
- Free Caddy Included

Power washing jets deep clean dirt that other cleaners leave behind.

FEWER CHEMICALS AND A HEALTHIER CLEAN.
