

New! Fusion

Platform Mode

Diving Mode

This new board can serve as a diving board, or a jump platform / poolside bench — you decide. A locking swivel mechanism allows pool owners to turn the board 90° and lock into a traditional diving board position or into a jump platform / poolside bench position.

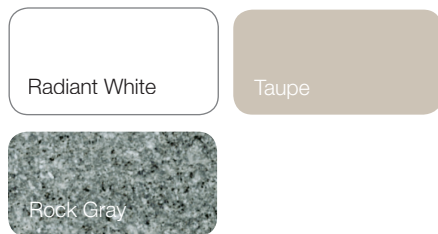

- Composite material diving board looks great, increases board strength and lengthens product life
- Diving board is twice the width of traditional diving boards at widest point — more bench space
- Board has a matching, SureFoot non-slip tread for maximum safety
- Stainless steel hardware for added corrosion resistance
- Bronze swivel mechanism locks for maximum safety
- Approved for use on Type I or greater pools

Fusion Board & Stand Combinations

| Model No. | Color | Shipping Wt. | 3 boxes Shipping | | | |
|--------------|--------------|--------------|------------------|-----|-----|------|
| | | | L | W | H | |
